Evidence labels prevent unlike measurements from sharing one truth claim

`official_cash_only`

Account funding cash is authoritative for cash; execution remains unproved

`snapshot_cost_proxy`

Current book and disclosed proxy; exit book or official mark may be absent

`four_book_paper`

Entry and exit books at fixed Q; no order feedback or account fills

`actual_fills`

Real order/fill evidence; fees and funding still require reconciliation

NA = unavailable evidence · verified empty event set = measured zero · missing record ≠ no event

Labels qualify evidence; they are not a universal ranking and cannot be used as return denominators.
